Task Tools & Abrasives Launches Three Unique Product Lines That Outperform the Competition

The Task FlexFit Grip family of hand tools, the Task Quiker Mixer for paint and colour coded Task Tile Spacers for tiling.

Delta, BC, April 22, 2008 – Task Tools & Abrasives, launches three new innovative product ranges for the North American hardware market, namely the Task Quiker Mixer, colour coded Task Tile Spacers and the Task FlexFit Grip drywall and cement range. Craig Caplan, President of Task Tools said, “We are always looking for innovative ways to improve our product in function and form. Sometimes it’s a simple ingenious idea like colour coding tile spacers, and other times we get top industrial engineers searching for the ultimate grip or paint mixer.” All three product lines are supported by the Task 100% satisfaction guarantee and will be available in hardware stores this April.

Task FlexFit Grip, the ultimate in comfort and durability

Designed by an award winning industrial engineer, the Task FlexFit Grip has five unique grip designs that maximize the tool comfort and reduce fatigue which often comes from using the same tool for extended periods. Using dual injection molding, the core of the handle is made from a tough impact resistant polypropylene that is then coated in a solvent resistant thermoplastic elastomer (TPE) rubber. This process makes the tool durable enough to meet the everyday demands of contractor use, while the TPE is tough enough to stand up to corrosive materials and a variety of solvents making it easy to keep clean. Exclusive to Task Tools & Abrasives, the Task FlexFit Grip is featured on over 60 new hand tools which support the paint, drywall, flooring, tiling, concrete and masonry applications.

Task Quiker Mixer™, fast and easy to clean

The Task Quiker Mixer is the ultimate time saver. The patented blade design has a unique shape-to-spacing ratio that mixes paint, adhesives or filler in seconds with a flawless consistency. The hexagonal high carbon steel shank fits securely into any hand drill. The non-porous polypropylene makes cleaning quick and easy, leading to a longer life span.

Colour coded Task Tile Spacers, quick to sort, easy to reuse

Task Tools brings a first to the industry with colour coded tile spacers based on size. While tile spacers are easy to reuse, they are not easy to sort when the only difference is fractions of an inch. A common solution of the past was to throw them out and spend time and money purchasing new ones. By colour coding tile spacers, contractors can easily keep track of their inventory and ensure that they are using the same size spacers for each job. The Task Tile Spacers save time, money and the environment. They are available in individual colour packs: red - 1/16", orange - 1/8", yellow - 3/16", green - 1/4" and blue - 5/16" or you can get the big combination pack of 750 total pieces in varying sizes.

About Task Tools & Abrasives

Founded in 1968, Task Tools & Abrasives is a family owned and operated business that provides quality products, exceptional customer service and innovative merchandising solutions to hardware retail customers across North America. The company has two brands, Task® and Tuf-E-Nuf®, which sell in four product categories - power tool accessories, hand tools, abrasives and leather goods and accessories. With over 150 employees, a leather manufacturing facility and three warehousing and distribution offices across Canada and the US, Task Tools & Abrasives offers over 4,000 products to over 4,000 retail partners.
