Task Tools & Abrasives Launches A Complete Range Of Contractor Grade Levels

Delta, BC, April 31, 2009 – Task Tools & Abrasives® adds 37 new products to offer a complete range of 48 contractor grade levels. “We are thrilled to offer this comprehensive line of levels that makes use of design innovation with premium materials to deliver tough and accurate tools for a wide range of jobs,” said Chris Waldner, Product Manager for Task Tools. Backed by Task’s Contractor Tough guarantee, the complete range will be available in stores this May.

Improved accuracy

Task has focused on improving accuracy for those jobs that have no margin for error. Select models feature super high accuracy solid acrylic vials offering unsurpassed accuracy to within 0.0005 inches per inch or 0.029° in any position. The vials are shock proof, UV resistant and will never fog, leak or break. Bubble size remains consistent in any working temperature. High accuracy tubular vials also offer outstanding accuracy to within 0.001 inches per inch or 0.057° and come at a great price. The patented Plumb Site® is another accuracy feature that allows the level user to read through a top window, eliminating the parallax error caused when reading the vial at an angle because of a vertical restriction. The Plumb Site improves accuracy, saves time and makes the job easier. Many models have machined edges for guaranteed surface flatness and improved accuracy.

Built to last

By using premium materials and innovative features such as the shock absorbing end caps, Task levels can be dropped without losing accuracy. Powder coating makes the levels scratch resistant and easy to clean. The *Cast Aluminum Masons Level* is equipped with patented hammer anvils that are designed to be hit by a hammer. A masonry worker can use it to check the level of a work piece while forcing it into level simultaneously, saving significant time. More than simply a plastic add on, the hammer anvils are integrated into the level ensuring that it will not lose its accuracy in the everyday use of masonry tasks.

A complete line

With ten *Specialty Levels*, seven *Torpedo Levels*, sixteen *I-Beam Levels*, one *Cast Aluminum Masonry Levels* and fourteen *Box Beam Levels*, Task has a level for any job of any size. Prices start at \$1.99 and vary according to size and features, ending with the premium *Signature Series Box Beam Level* at \$189.99

About Task Tools & Abrasives

Founded in 1968, Task Tools & Abrasives is a family owned and operated business that provides quality products, exceptional customer service, and innovative merchandising solutions to hardware retail partners across North America. The company has two brands, Task® and Tuf-E-Nuf®, which sell in five product categories - power tool accessories, hand tools, abrasives, leather goods & accessories, and Cargo Security. With over 150 employees, a leather manufacturing facility, and three warehousing and distribution offices across Canada and the US, Task Tools & Abrasives offers over 4,000 products to over 4,000 retail partners.
